PEAK Launches Nvidia GTS 250 Graphics Cards

PEAKHARDWARE INTL CO., LTD (PEAK), one of Taiwan's leading suppliers of flash memory, VGA cards and related computer peripherals, today releases its new graphics cards series, the **Nvidia GTS 250**. The new series is an evolution of the 9800GTXplus and is powered by the new GTS 250 GPU. The **PEAK GTS 250 series** has up to 2GB DDR3 embedded memory. Equipped with three outputs of D-sub, DVI and HDMI, the new cards can satisfy the different requirements.

Producing an amazing leap forward in video processing performance, the GPU clock speed of **PEAK GTS 250 series** can reach 745MHz and the extreme RAM clock speed of 1000MHz. It also supports displays of up to 2560x1600 resolution with D-sub, DVI and HDMI outputs. The new cards use the latest PCI Express 2.0 interface, allowing up to twice the throughput of PCI Express 1.1, and the built-in native Nvidia® SLI™ technology allows two graphics cards to be used in a single PC, increasing graphics performance by a factor of up to 2x.

PEAK's Product Manager, Albert Tung, said, "The latest **PEAK GTS 250 series** can allow users to experience the amazing visual effects and enhanced interactive game processing provided by the advanced technical features incorporated into these outstanding cards. PEAK presently has two versions of the card with 512MB and 1GB of DDR3 embedded memory respectively and we are going to release a 2GB model soon."

PEAK produces both Nvidia and ATI graphics cards. For full details of all PEAK graphics cards, please visit our website at www.peakhardware.com
